## DETAILED ACTION

### *Informalities*

On page 11, line 25, indicates forming a salt bridge with the guanidinium group of "Arg-14", but the text indicates "Arg-13". Appropriate correction is required.

On page 12, line 8, indicates forming a salt bridge with the guanidinium group of Arg-14, but the text indicates "Arg-13". Appropriate correction is required.

### *Claim Objections*

1. Claim 9 is objected to as not conforming to 37 CFR 1.821(d). Note the absence of "SEQ ID NO:" in the claim.

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite because the claim does not define "X" in the sequence of the cyclic peptide (pI). The term "X" renders the claim indefinite, it is unclear what kind of sequence is obtained for the cyclic peptide (pI), e.g., is X a natural amino acid, a modified amino acid or a specific amino acid? The disulfide bond between two cysteines is formed in the cyclic peptide, addition of "-S-S-" is suggested.
3. Claim 10 is indefinite because the claim is a dependent claim of a cancelled claim (claim 7).

*Conclusion*

4. No claims are allowed.
